BEYOND THE BASICS: Radiology & Planmeca Romexis®

MIS4A

Are you familiar with the anatomy in the new images you are taking?

Congratulations on your Planmecca ProMax® 2D/3D system purchase. The information in your digital images is clearer and more detailed than the images you may have studied in school.

To hone your skills and take advantage of this new information, Planmecca is hosting a 2-day training seminar featuring a radiologist and a group of software experts to get you up to speed on dentistry's latest technology.

Please review Planmecca Romexis® tutorials at: www.planmeccausupport.com

Laptops to be provided for hands on Planmecca Romexis® Software Training in the latest 4.XX software version.

50 N. Gary Avenue Ste. B | Roselle, IL | 60172 | P: (630) 529-2300

4:00 P.M. - 6:00 P.M.	Networking Event

SATURDAY

8:00 A.M. - 12:00 P.M.	Planmecca Romexis® Training - 3D & Technique
12:00 P.M. - 1:00 P.M.	Lunch
1:00 P.M. - 4:00 P.M.	Peer Review

EVENT DESCRIPTION

DAY ONE

MORNING: Study of basic anatomy in digital images versus flat film images. Since the digital format offers a greater range of clinical information, our radiologist will work with you to recognize and understand these new details, and how they can enhance your diagnostic capabilities and quality of care.

AFTERNOON: A comprehensive overview of Planmecca Romexis® software and how to utilize its robust set of applications in order to maximize the efficiency of treatment planning. In this hands-on portion, software trainers will spend time reviewing the tools, manipulating and rendering your image.

DAY TWO

MORNING: Software training continues. Now that the basics are covered we will learn to plan implant cases, learn how to diagnose from what we see in the 3D image that was not seen in the 2D image.

AFTERNOON: A unique opportunity to bring in your images for a peer review to help you be more confident in your planning and techniques. Our software trainers will be available to show you the best tools to use in Planmecca Romexis® for an optimized treatment plan.
